

NAME: - AYUSH PANDEY

BATCH: - AZ-900 + AZ-104 (12th July 2025)

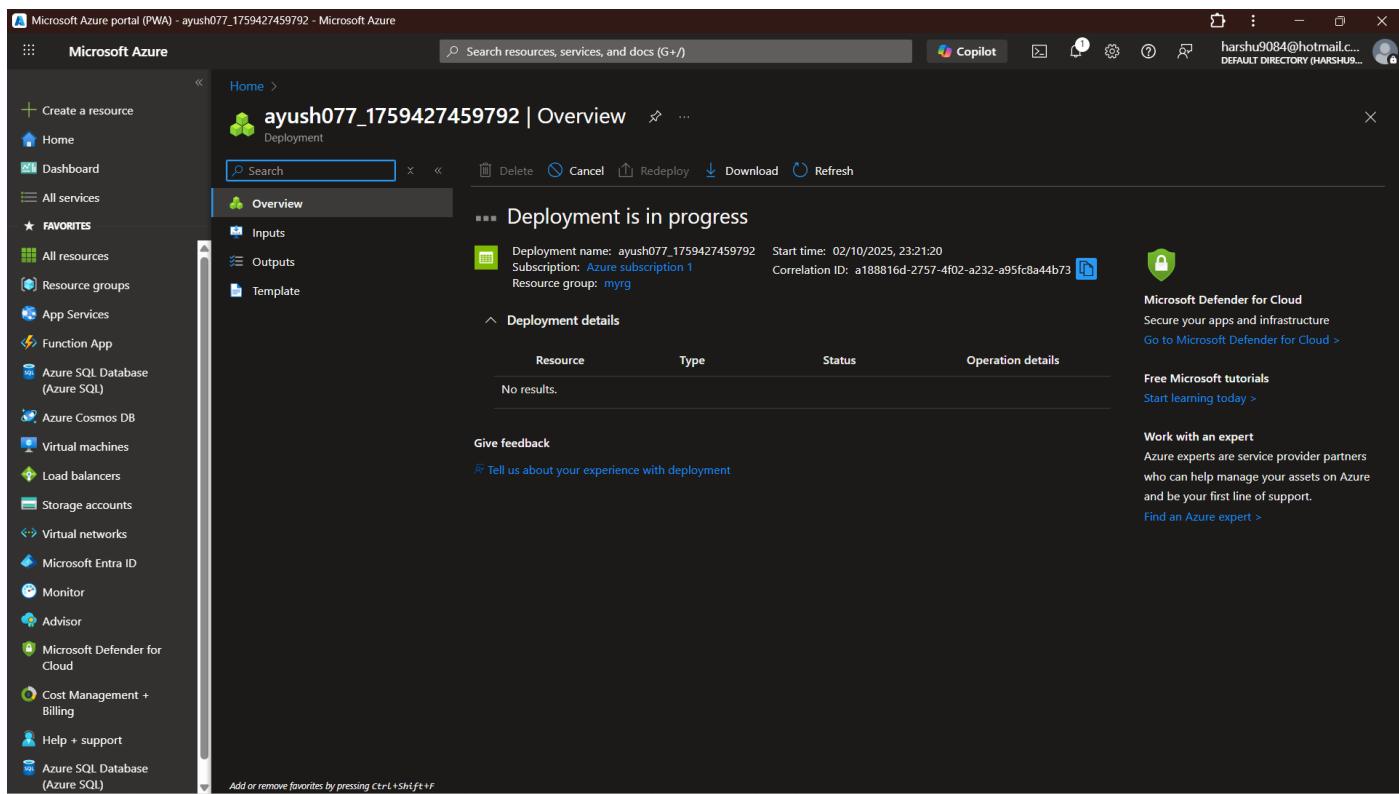

Assignment 05: - Map a custom domain to an Azure Blob Storage endpoint

✓ **Step 1: Get the host name of your storage endpoint.**

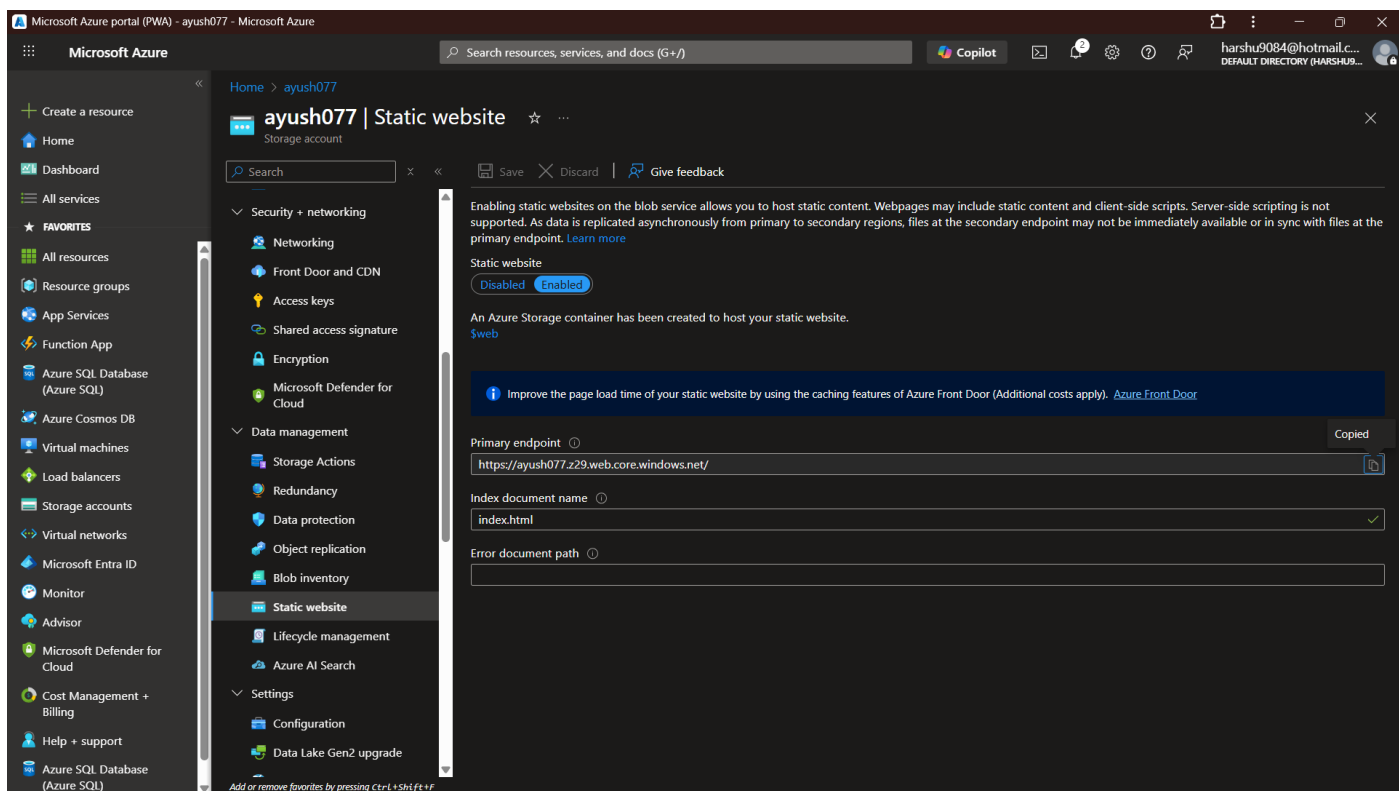

Create a Storage Account

The screenshot displays the 'Create a storage account' wizard in the Microsoft Azure portal. The interface is in a dark theme. On the left is a sidebar with navigation links like 'Home', 'Dashboard', 'All services', and 'FAVORITES'. The main content area shows the 'Create a storage account' page with tabs for 'Basics', 'Advanced', 'Networking', 'Data protection', 'Encryption', 'Tags', and 'Review + create'. The 'Basics' tab is active, showing a description of Azure Storage and 'Project details'. Under 'Project details', there are dropdowns for 'Subscription' (set to 'Azure subscription 1') and 'Resource group' (set to 'Select existing item...'). Below this is the 'Instance details' section with a text input for 'Storage account name', a dropdown for 'Region' (set to '(Asia Pacific) Central India'), and a dropdown for 'Preferred storage type' (set to 'Choose preferred storage type'). The 'Performance' section has two radio buttons: 'Standard' (selected) and 'Premium'. At the bottom, there are 'Previous', 'Next', and 'Review + create' buttons. A 'Give feedback' link is in the bottom right corner.

Deployment of the Storage Account
